LECTURE 6: FIRST FLUTTER APP

LIVE WORKSHOP

In Flutter, "Everything is a Widget"

WIDGETS VS. OBJECTS

Both: created by *classes*

Widgets are **temporary objects,**

To construct a "presentation" in its current state

Objects are persistent

Works between calls to the build() function; allows remembering

https://flutter.dev/docs/development/ui/widgets-intro

APPLICATION DEVELOPMENT SOFTWARE

Developers
Low Level – no GUI

Deliberate | Manual
Flexibility & Control

TODAY: CREATE A HELLO WORLD! APP

Check: is Flutter installed properly?

Start Android Studio

Write code

Test in AVD

Turn it in (DartPad Gist)
